OBJECTIVE

As an innovative second-year computer science student with a passion for software development, I bring a strong foundation in coding, problem-solving and technical skills. I have worked on projects utilizing various programming languages including Java, Python, and C. With a focus on delivering high-quality and user-friendly software, I am always looking for new challenges and opportunities to improve my skills. I am confident that I have the skills and drive to make a valuable contribution to any software development team, and I am eager to bring my enthusiasm and experience.

SKILLS

IT Skills: Java, Python, HTML/CSS, PHP, JavaScript, C
Soft Skills: Accountability, Adaptability, Communication, Teamwork, Time Management

PERSONAL PROJECTS

Calculator

A simple calculator I built using Java in Apache NetBeans IDE 15 in my free time. It showcases a combination of various components and functions that work together to imitate a real working calculator.

Hangman Game

A simple hangman game I created using Python on VS Code. It consists of over 800 playable words and can be played in the terminal.

Website Development

Creation of a user-friendly toy website as part of the Web Development module at university. This included creation of HTML code for four navigation pages with CSS styling to implement a responsive and fluid layout that resizes. PHP was also utilized to access data from database tables and to activate server-sided scripts.

EDUCATION

BSc. Computer Science with AI
Northumbria University
(2021 – Current)
First Year Grade: Distinction

CERTIFICATES

HarvardX – CS50's Introduction to Programming with Python
Cambridge, Massachusetts, 2023

LANGUAGES

English - Expert
Urdu – Native
Hindi – Native
